

## **FOI\_1343\_2023-24 – FOI Request Concerning – Digital Test Results Access for patients**

---

### **1. Does your trust share test results digitally with patients?**

Yes, in Sexual Health

### **2. What system do patients use to access their test results digitally? (e.g. PKB, EPIC My chart, Other - please state)**

Our laboratories across all of Hampshire link into our bespoke Patient Health record (INFORM) by the LIMS (Laboratory Information management system) and results are shared directly into the electronic patient record.

The team text patient's negative results and invite those with positive results to attend service for treatment.

For patients requesting online test kits if the test results are negative, they are sent a personal text from the doctors' laboratory, a subcontractor, providing this online service. Positive clients are invited into service for treatment and support by the team.

### **3. Please list which hospital departments are sharing tests results digitally?**

Sexual Health

### **4. Which results (if any) are not automatically shared digitally with patients?**

Ultrasound results

### **5. Do you delay sharing digital test results? Please state how long this delay is (7 days, 14 days, 21 days, 28 days, or longer)**

All tests shared are within 7 days

### **6. If you are not currently sharing test results digitally please state when you plan to start sharing**

N/A
