System definitions:

Adult (working age) services: This may be an independent system for managing these patients, or it may be part of the trust's EPR functionality.

BI & Data Warehousing: Integrates data and information collected from various sources, e.g. electronic patient/health records, enterprise resource planning systems, radiology and lab databases, wearables etc, into one comprehensive database

Child and Adolescent Mental Health Services (CAMHS): is a broad term for all services that work with children and young people who have difficulties with their emotional or behavioural wellbeing.
Eating disorders: This may be an independent system for managing these patients, or it may be part of the trust's EPR functionality.

ePOA: A digital platform/app that streamlines the pre-operative assessment process, replacing traditionally paper-based tasks with electronic data collection for efficiency. It allows patients to provide essential information online before their hospital visit and engage in a structured assessment, often with a nurse, to ensure a smooth and efficient preparation for surgery. Some suppliers include, AireLogic, Definition Health, OpenMedical.

Electronic Care Programme Approach (eCPA): The system is designed to improve the quality of information in CPA care plans and, for the first time, to enable the rapid and standardised adoption of evidence-based good practice.

E-rostering: An electronic staff management tool that enables trusts to plan staffing requirements, report on enhanced hours, overtime, sickness, TOIL and annual leave.

Learning disabilities: This may be an independent system for managing these patients, or it may be part of the trust's EPR functionality.

Main Community System: A main community system is a software system that supports the delivery of community health services by enabling electronic patient records (EPR) and case management. Civica Paris and Servelec Rio are examples of main community systems. They help to improve patient outcomes by providing a single view of patient information, supporting multi-disciplinary team working, integrated health and social care services, and online and offline mobile working.

Older Adults: This may be an independent system for managing these patients, or it may be part of the trust's EPR functionality.

Statutory reporting: Simple BI producing Statutory Returns which need to be made to Central Government – e.g. PBR, MHMDS, CDS, HES, NDTMS – as appropriate to commissioned clinical services. Typically, these are contained within the ROCR (Register of Central returns) and have been through an approved "gateway" process. Please provide information regarding the following systems:
Please enter 'No System Installed' or 'No Department' under supplier name if your trust does not use the system or have the department:

1. **Adult (working age) services**
   a) **System type**
      Clinical Patient System
   b) **Supplier name**
      The Phoenix Partnership Limited (TPP)
   c) **System name**
      System One
   d) **Date installed**
      The Trust rolled this system out across from 01/04/2011
   e) **Contract expiration**
      30/06/2025
   f) **Is this contract annually renewed?**
      No
   g) **Do you currently have plans to replace this system?**
      No
   h) **Procurement framework**
      SBS Framework agreement
   i) **Other systems it integrates with?**

SBS Framework agreement

j) Total value of contract (£)

£2,063,101.5

k) Notes - e.g., we are currently out to tender

No

2. BI & Data Warehousing

a) System type

BI Reporting Tool

b) Supplier name

Microsoft

c) System name

Power BI

d) Date installed

2018

e) Contract expiration

Annual Agreement / Licensing

f) Is this contract annually renewed?

Yes

g) Do you currently have plans to replace this system?

No

h) Procurement framework

Standard NHS

i) Other systems it integrates with?

Azure Data Warehouse, and other Microsoft products

j) Total value of contract (£)

These costs are part of a larger contracting cost and cannot be broken down to individual costs"

k) Notes - e.g., we are currently out to tender

No

3. Child and Adolescent Mental Health Services (CAMHS)

a) System type

Clinical Patient System

b) Supplier name

The Phoenix Partnership Limited (TPP)

c) System name

System One

d) Date installed

The Trust rolled this system out across from 01/04/2011

e) Contract expiration

30/06/2025

f) Is this contract annually renewed?

No

g) Do you currently have plans to replace this system?

No

h) Procurement framework

SBS Framework agreement

i) Other systems it integrates with?

SBS Framework agreement

j) Total value of contract (£)

£2,063,101.5

k) Notes - e.g., we are currently out to tender

No

4. Eating disorders

N/A To Solent NHS Trust

5. ePOA

N/A To Solent NHS Trust

6. Electronic Care Programme Approach (eCPA)

N/A To Solent NHS Trust

7. E-rostering

a) System type

HR

b) Supplier name

Allocate Optima

c) System name

Health Roster Optima

d) Date installed

01/09/2020

e) Contract expiration

2024

f) Is this contract annually renewed?

No

g) Do you currently have plans to replace this system?

No

h) Procurement framework

Call-Off Contract under the Health Trust Europe LLP Framework Agreement for the provision of Enterprise Level Information Communication Technology (ICT) Solutions for hardware, software, programs, applications, security, computer science, managed services, consultancy, support, and associated services – 2019 (reference number: SF050716) dated 27th September 2019

i) Other systems it integrates with?

Bank Staffing / Selenity Expenses / ESR

j) Total value of contract

258K over 3 years

8. Learning disabilities

a) System type

Clinical Patient System

b) Supplier name

The Phoenix Partnership Limited (TPP)

c) System name

System One

d) Date installed

The Trust rolled this system out across from 01/04/2011

e) Contract expiration

30/06/2025

f) Is this contract annually renewed?

No
